A national member federation is eligible to submit candidates for FIBA Licenses, based on the principles and requirements set out in the FIBA Internal Regulations and the FIBA Game Officials Licensing 2025-2027 - Guidelines for national member federations.

The License Allocations' Number does not automatically guarantee a national member federation a maximum number of approved Licenses.

The License Allocations' Number gives a national member federation a right to apply for the designated number of Allocations. However, in each case, after a thorough analysis, FIBA will decide on the final number and categories of Licenses per national member federation.
